In December 2020, US Attorney General Bill Barr said there was “no evidence” of widespread voter fraud in the 2020 election.

Barr said **there was no evidence** of widespread voter fraud in the 2020 election, defying President Donald Trump’s ongoing efforts to reverse the results.

Bill Barr: No evidence of fraud that would affect election outcome

Barr repeated this claim several times since leaving office as President Trump’s Attorney General.

Now there is proof that Bill Barr is and was lying.

On Thursday former Trump adviser Jeffrey Clark, the Director of Litigation at the Center for Renewing America, joined Steve Bannon on **The War Room**.

Jeffrey Clark told Steve the Center for Renewing America sent out FOIA requests to 12 US Attorney districts from the 2020 battleground states.

Bill Barr sent out a memo on November 9, 2020, saying there should be investigations of the elections.

Jeff Clark told Steve Bannon the FOIA requests have come back from every district but one with NO DOCUMENTS.

No investigations were done as a result of that memo. There is only one of the 12 districts that has not yet come in and that's the eastern district of Pennsylvania.

The US Attorney of the Eastern District asked to investigate issues in his district. Barr denied the request!

Bill Barr lied to the American public. Now he got caught.

Jeffrey Clark joined **The War Room** on Thursday to break the news.

And now there is further proof that Bill Barr lied.

FOIA Fan on Twitter FOIA'ed information on any DOJ investigations of voter fraud in the 2020 election.

No documentation was found on any investigation.

It was all a lie.
