The CDC seems to have been systematically swapping in Covid as the Underlying Cause of Death on death certificates listing a different condition as the UCoD.

To briefly recap what we've covered [in previous articles](#), the CDC applies medical diagnostic codes from the ICD-10 database for all conditions listed as a CoD on death certificates.

The thesis explores how the CDC has been systematically misclassifying covid as the UCoD on death certificates that clearly list a different condition as the Underlying Cause of Death, or where covid was obviously not the UCoD even if it was technically listed in the position of the UCoD by the coroner or ME who filled out the death certificate. The CDC does this by entering the ICD code for covid – U07.1 – as the UCoD even though the death certificate itself lists a different condition as the UCoD.

To be clear, this isn't meant to capture coroners adding covid as a CoD where covid clearly was clinically irrelevant. Rather, what I am highlighting is a subset of "covid" deaths where the CDC swapped in covid as the UCoD even though it wasn't documented as the UCoD on the death certificate by the coroner/ME.

In other words, potentially an enterprise of systemic out-and-out fraud by the CDC to falsely portray deaths that at best covid 'helped' hasten the demise of the decedent as deaths where the death was primarily instigated by covid.

(Note: there are some instances where UCoD swapping is technically justified because of clear mistakes involving the manner and order of the CoD's on the death certificate. However, this cuts both ways, and the CDC doesn't seem to have subjected UCoD's listing covid to the same degree of

scrutiny or standard. This is something that we will hopefully explore in greater detail in future articles.)

Massachusetts

There were 18,074 deaths in Massachusetts through Q1 2023 that list U07.1 – covid – as the UCoD.

Of these 18,074 death certificates, 5,721 list a condition other than covid as the UCoD.

The following is a list of all of the different text descriptions of conditions listed as the UCoD where the CDC assigned the ICD 10 UCoD as covid, and the number of death certificates where this UCoD was coded as U07.1 (covid) by the CDC (listed in order from most frequent to least frequent):

1. DEMENTIA -- 573x
2. PNEUMONIA -- 296x
3. CHRONIC OBSTRUCTIVE PULMONARY DISEASE -- 227x
4. CONGESTIVE HEART FAILURE -- 129x
5. HYPERTENSION -- 125x
6. CORONARY ARTERY DISEASE -- 123x
7. ACUTE KIDNEY INJURY -- 102x
8. ACUTE RENAL FAILURE -- 101x
9. FAILURE TO THRIVE -- 98x
10. RESPIRATORY FAILURE -- 95x
11. SEPTIC SHOCK -- 87x
12. ADVANCED DEMENTIA -- 83x
13. SEPSIS -- 81x
14. ASPIRATION PNEUMONIA -- 78x
15. ACUTE HYPOXIC RESPIRATORY FAILURE -- 76x
16. CHRONIC KIDNEY DISEASE -- 71x
17. ATRIAL FIBRILLATION -- 70x
18. ACUTE RESPIRATORY DISTRESS SYNDROME -- 68x
19. RENAL FAILURE -- 58x
20. END STAGE RENAL DISEASE -- 54x
21. ACUTE RESPIRATORY FAILURE -- 53x
22. ORGANIC BRAIN SYNDROME -- 51x
23. PARKINSON'S DISEASE -- 49x
24. BACTERIAL PNEUMONIA -- 46x
25. DIABETES -- 46x
26. DIABETES MELLITUS -- 43x
27. HYPOXIC RESPIRATORY FAILURE -- 42x
28. END STAGE DEMENTIA -- 37x
29. ALZHEIMER'S DEMENTIA -- 35x
30. HEART FAILURE -- 35x
31. CARDIAC ARREST -- 31x
32. PULMONARY EMBOLISM -- 30x
33. ALZHEIMER'S DISEASE -- 29x
34. INTERSTITIAL LUNG DISEASE -- 29x
35. CARDIOPULMONARY ARREST -- 28x
36. STROKE -- 28x
37. URINARY TRACT INFECTION -- 27x
38. ADULT FAILURE TO THRIVE -- 26x

Minnesota

There are 12,068 deaths in Minnesota through Q1 2023 that the CDC assigned U07.1 – covid – as the UCoD.

Of these, 2,758 identify a condition other than covid as the UCoD:

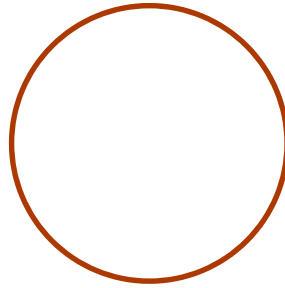

Minnesota

There are 12,068 deaths in Minnesota through Q1 2023 that the CDC assigned U07.1 – covid – as the UCoD.

Of these, 2,758 identify a condition other than covid as the UCoD:

1. NATURAL CAUSES -- 161x
2. DEMENTIA -- 94x
3. PNEUMONIA -- 66x
4. COPD -- 64x
5. CHRONIC OBSTRUCTIVE PULMONARY DISEASE -- 51x
6. ACUTE HYPOXIC RESPIRATORY FAILURE -- 46x
7. HYPERTENSION -- 44x
8. SEPSIS -- 39x
9. ACUTE RESPIRATORY FAILURE -- 35x
