**B**eginning with Robert Parry's work in 2014 to identify U.S. involvement in the Kiev coup, the role played by neo-Nazis, and the danger of nuclear confrontation, *Consortium News* has been on the forefront of Ukraine coverage. That's because we don't leave out facts inconvenient to U.S. and Western interests, which completely manipulates the story.

Here are some of the most important original *Consortium News* stories on Ukraine since 2014.
